

**PARTNERING WITH EXPERTS
TO HELP SUPPORT
UK INNOVATORS**

WANT TO PARTNER WITH US?

Sciopolis is creating a network of Innovation Hubs that provide early-stage science and technology businesses with the workspace, laboratories and support they need to grow.

In the early stages, these ventures face the challenge of finding the right expertise to help them build their business.

With needs ranging from funding to science support, talent to marketing, legal to laboratory supplies, this can be an extremely time-consuming and distracting period for founders and their teams.

That's why Sciopolis' sites come with access to a pre-vetted network of experts, simplifying and accelerating this process for all our members.

We are continually searching for new and relevant partners to join our network, and help us support our dynamic ecosystem.

Want to be one of them?

HOW THIS BENEFITS YOU

- **Early Access to a Growing Community:** gain access to a community of early-stage innovators . Build early relationships and position yourself as a trusted advisor.
- **Broaden your Reach:** engage with a geographically diverse community of innovators by partnering with Sciopolis as it rapidly expands its network of Innovation Hubs.
- **Thematically align:** whether you are interested in CleanTech, Life Sciences or AI innovation- our sites will build strong thematic clusters , allowing you to align your proposition.
- **Enhance your reputation by supporting Innovation:** help ventures scale to commercialisation, playing an active part in making the UK a Science & Technology Superpower.

WHO WE PARTNER WITH

- Universities, organisations, companies and individuals who have a genuine interest in science and technology innovation and experience in early-stage venture building.
- Across all sectors: Universities' Enterprise departments, equipment providers, funding and investment, marketing, finance, IP and legal support, science development and manufacturing, grant writers, etc.
- Willing to engage deeply with our locations (currently London and Cambridge). We only recommend partners whom we have met, or those vouched for by our members.

Our Innovation Hubs will attract companies from science and technology backgrounds such as:

- AI/ Tech
- Cleantech
- Sustainable Materials
- Energy/Battery
- Life Sciences
- Sustainable Food
- ATMP Manufacturing
- Medical Devices

HOW WE PARTNER

We establish tailored partnerships with experts that align with the needs of our members, and expect them to engage in one of the following ways:

- Partner on projects or share equipment, talent or insight.
- Host thought leadership events, learning sessions and free workshops at our locations.
- Offer relevant services for early-stage companies, mindful of their unique needs and financial constraints.
- Grant access to networks such as alumni connections and offer mentorship opportunities.
- Schedule periodic drop-ins at our sites to maintain active interactions with our community.

In exchange, our partners enjoy:

- Access to our member community.
- Inclusion in our "Vouched-for Partners" list.
- Personal recommendations to our members as appropriate.

ABOUT SCIOPOLIS

- Sciopolis creates remarkable Innovation Hubs where early-stage science & technology companies can develop and grow.
- It does so by partnering with landlords, universities and local governments to design, develop and operate flexible and affordable, ready-to-occupy laboratory and office spaces.
- The creation of the physical space happens in parallel with the activation of the supporting ecosystem, by connecting every site with universities and local government.
- Additionally, Sciopolis provides its members with access to vouched for service providers that can support their growth.
- The founding team comes with a wealth of experience in the sector.
- Mark Sanders, Charlie Mitchell and Caterina Rigoni worked on the creation of Scale Space, the innovative technology and life sciences hub in London White City. Adam Kelliher and Lee Harle are life science venture builders.
- Imperial are a shareholder in Sciopolis.
